

Earthquake!

We just had a 7.1 earthquake and so much of your family's stuff is damaged. Luckily you remembered that you had typed up a list in Excel of major purchases. They ask you for the list, where is that list? OH NO! It's gone; you have to make another one. This list is very important because it will be given to the insurance company so your items can be replaced. Open up Excel and make a list of 20 items your family owns and could be damaged in a major earthquake. For each item list: Description, Model #, Quantity, Value/each, Total Value and add a picture from the Internet so the insurance person can see what the item should look like. **At the bottom you should have a total replacement value for all your items, you'll need to use another formula for that.** Use the sample below as a guide. Don't forget the title for your spreadsheet. Submit your spreadsheet at Ustudy.org, DO NOT PRINT OUT!

Earthquake Damaged Belongings of the Esparza Family

Description	Model #	Quantity	Value	Total Value	Picture
IPOD Touch	16 GB	2	\$288.89	\$577.78	
42"Plasma Screen TV	42PG25	3	\$ 995.00	\$ 2,985.00	
Apple IPOD Nano	8 GB	3	\$ 137.98	\$ 413.94	

You will need a formula for the total value that multiplies the Value times the quantity

Don't forget the total replacement at the bottom of your spreadsheet, it should be a formula here too.

Stereo	p9MJ56gg	1	\$39.5		
Total Replacement:				\$9,836.38
